

# Center for Scientific Computation And Mathematical Modeling

University of Maryland, College Park

## Workshop Announcement

# 2010 Tutorial School on Fluid Dynamics: Topics in Turbulence

May 24-28, 2010

### Tutorial Instructors

**Elias Balaras**  
University of Maryland

**Peter Bernard**  
University of Maryland

**Marcelo Chamecki**  
Pennsylvania State University

**Bin Chen**  
Xi'an Jiatong University

**Gregory Eyink**  
Johns Hopkins University

**Mohamed Gad-el-Hak**  
Virginia Commonwealth University

**Kenneth Kiger**  
University of Maryland

**Pino Martin**  
University of Maryland

**Charles Meneveau**  
Johns Hopkins University

**Kyle Squires**  
Arizona State University

**Katepalli Sreenivasan**  
New York University

**James Wallace**  
University of Maryland

### Organizers

<b>Charles Meneveau</b>	Johns Hopkins University
<b>Rajarshi Roy</b>	University of Maryland
<b>Katepalli Sreenivasan</b>	New York University
<b>Eitan Tadmor</b>	University of Maryland
<b>James Wallace</b>	University of Maryland

### Scientific Background

The turbulent motion of liquids and gases is a ubiquitous phenomenon in nature and engineering. Such motion is fundamental to the formation of planets from interstellar clouds of particulates, to the dynamics of the earth's atmosphere and oceans that determine weather systems, to the mixing of reactants in combustion, to the dispersion of pollutants from smokestacks and storm sewers, and to the health risks caused by diseased arteries, to name but a few examples. Understanding and modeling the physics of turbulent motion is the basis of predicting its effects in these and numerous other examples and controlling it in engineering applications such as the design of air and surface vehicles, efficient engines for propulsion, heat exchangers and stents and heart valves.

### Partial funding is provided by

**The Burgers Program for Fluid Dynamics**  
University of Maryland

**The Institute for Physical Science & Technology**  
University of Maryland

**Center for Environmental and Applied Fluid Mechanics**  
Johns Hopkins University

**The National Science Foundation**

### A limited number of openings are available.

Full consideration will be given to advanced graduate students and post-docs who have had an introductory graduate-level course in turbulence and who apply before the deadline of **February 1, 2010**.

To apply, please RSVP at:

[www.cscamm.umd.edu/programs/trb10/rsvp.htm](http://www.cscamm.umd.edu/programs/trb10/rsvp.htm)
